## MULTI SIZE FLEXIBLE LARGE PACKER WITH BYPASS AND WHEELS FROM 800 to 2200 mm PIPE DIAMETER

Flexible packers have a single ply of rubber textile covering and at every corner both have wheels placed at an angle of 120 °. These rollers provide stability in movement inside the pipe. The design of these packers allows water flow during the repairing process.

These flexible packers can be easily installed in the pipeline.

| Part Number      | Nominal Size | Cylinder Length | Min-Max diameter Repair length | Required Inflation Pressure | Product Diameter | Product Total Length | Bypass Diameter | Product Weight |
|------------------|--------------|-----------------|--------------------------------|-----------------------------|------------------|----------------------|-----------------|----------------|
|                  |              | (mm)            | (mm)                           | (bar)                       | (mm)             | (mm)                 | (inch)          | (kg)           |
